

HEUFT training courses - dates

The range of HEUFT training courses offer you the opportunity to deepen your knowledge regarding the devices, their function, operation and maintenance. Our experienced trainers will pass on theoretical background information to you in our modern lecture rooms. The knowledge imparted on these courses will lead to a better understanding of the devices and will simplify their operation. In addition to the theoretical part a great deal of attention will be paid to the practical operation of the devices. The participants can try out the various functions on the training devices in peace and quiet without interrupting production at their place of work.

Please contact us if you are interested in one of our training courses, have further questions or require additional information at: training@heuft.com or telephone Mrs Magin on +49 (0) 26 36 / 56 2671. We would be pleased to arrange training courses concerning other subjects / products or additional dates upon request.
