

CONTAINER FANNING OUT SYSTEM

HEUFT *relax*

The HEUFT *relax* container fanning out system

careful distribution of cylindrical containers

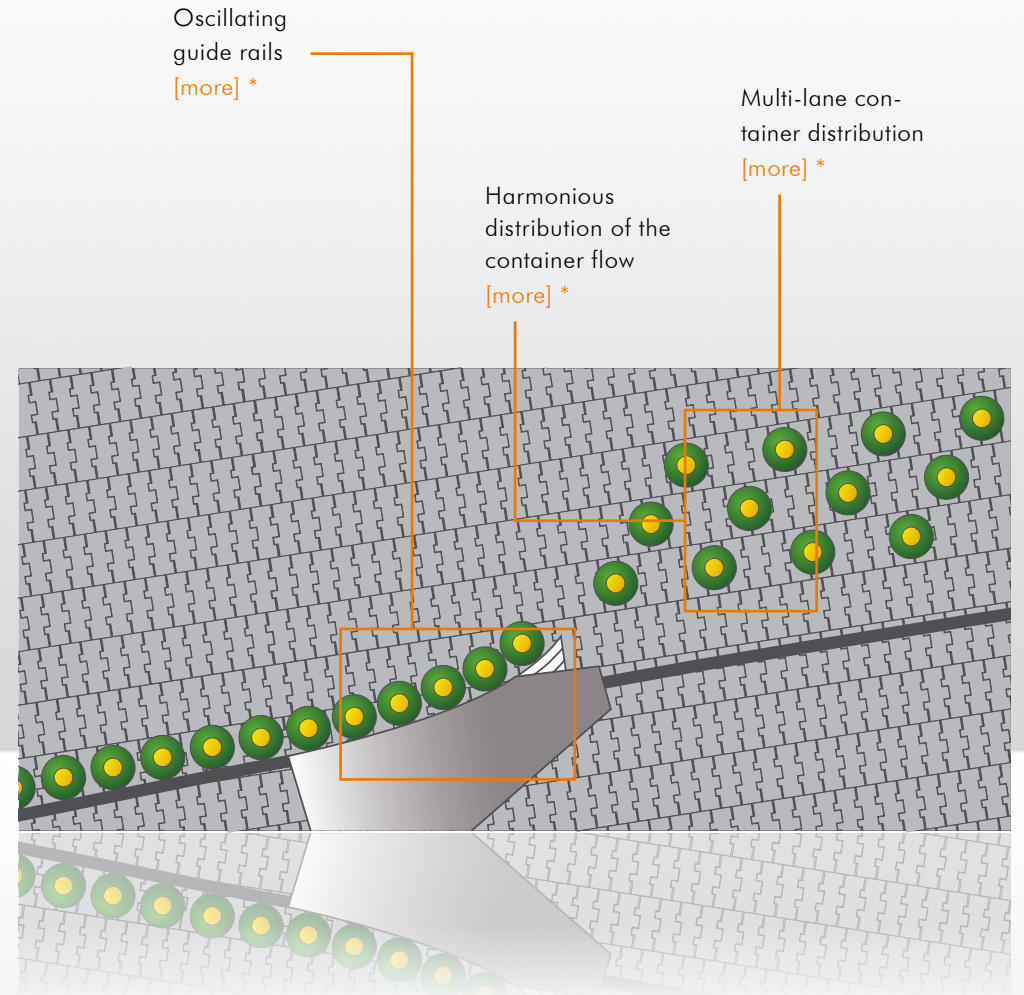

FUNCTIONS

- container distribution at the crossover from a single-lane to a multi-lane transport system

- oscillating guide rails
 - speed-dependent control system
- [more]*

THE ADVANTAGES

- harmonious distribution of the container flow

- optimal use of the conveyor capacity for increased line efficiency
 - continuous container flow at lower conveyor speed
 - drastic noise reduction
 - minimum wear and tear
 - considerable amount of space saved during the fanning out process
- [more]*
