

Operators' seminar HEUFT *eXaminer XA*

The benefits...

During this seminar you will learn everything about the construction of the HEUFT *eXaminer XA* full container inspection and how the individual components work. Container tracking, safety concept, product liability, base and sidewall inspection will be explained to the operator in easy to understand terms.

You will also learn:

- how you can help yourself
- how the full container inspection can help as regards product safety

A great deal of attention will be paid to handling and operating the devices. The knowledge imparted on the course will lead to a better understanding of full container checks thereby simplifying the handling of the devices.

Taking advantage of our remote service will reduce downtimes considerably because immediate help is available if the need arises.

Seminar programme (three days):

- The HEUFT *SPECTRUM* philosophy
- Detection systems
- Base detection
- Sidewall inspection
- Operating conditions
- Shifting register
- Rejection system
- Networking possibilities (remote service, HEUFT *PILOT*)

Practical training

- HEUFT *PILOT* user surface
- Using the online help
- System analysis with the logic analyzer
- Replacing spare parts

Target group

Employees from production, maintenance and quality control departments

Registration for operators' seminar HEUFT Foreign Object Inspection HDT300XAX
