

Expert Training HEUFT *InLine*

The benefits...

During this seminar you will learn everything about the construction of an empty bottle inspector and how the individual components work. The infeed check, bottle tracking, safety concept, product liability as well as base, finish and sidewall inspections will all be explained to your technical Expert in easy to understand terms.

You will also learn:

- how you can help yourself
- how the empty bottle inspector can help as regards product safety

- how the empty bottle inspector can give you information about your production

A great deal of attention will be paid to handling and operating the devices. The knowledge acquired during this seminar will lead to a better understanding of full container checks thereby simplifying the handling of the devices.

Taking advantage of our remote service will reduce downtimes considerably because immediate help is available if the need arises.

Seminar programme / training (three days):

- the HEUFT *SPECTRUM* philosophy
- Detection systems
- Base detection
- Finish detection
- Sidewall inspection
- HF residual liquid (Iye)
- IR residual liquid (oil)
- Operating conditions
- Shifting register
- Rejection systems
- Networking possibilities (remote service, HEUFT *PILOT*)
- HEUFT *PILOT* user surface
- Cleaning and maintenance work

- Using the online help
- HEUFT *TeleService*

Workshop (one day):

- System analysis with the logic analyzer
- Replacing spare parts
- Cleaning the optics
- Fault analysis in more detail

The prerequisite for participation in the workshop is the previous participation in the training course.

Target group

Technically qualified and experienced employees from production, maintenance and quality assurance departments
