

Operators' seminar HEUFT *InLine reflexx*

The benefits...

During this seminar you will learn everything about the construction of an empty bottle inspector and how the individual components work. Infeed check, bottle tracking, safety concept, product liability as well as base, finish and sidewall inspections will all be explained to the operator in easy to understand terms.

You will also learn:

- how you can help yourself
- how the empty bottle inspector can help as regards product safety
- how the empty bottle inspector can give you information about your production

A great deal of attention will be paid to handling and operating the devices as well as practical exercises using the training devices.

The knowledge acquired during this training course will lead to a better understanding of empty bottle inspectors thereby simplifying the handling of the devices. Downtimes can be reduced considerably because we show you how you can help yourself and / or use the remote service.

Seminar programme (four days):

- The HEUFT *SPECTRUM* philosophy
- Introduction to the detection systems
- Basic principles of the HEUFT image processing system
- The HEUFT *reflexx* base detection
- The HEUFT *reflexx* finish detection
- The HEUFT *reflexx* sidewall inspection
- HF residual liquid (lye)
- IR residual liquid (oil)
- Operating requirements

- Container tracking using a shifting register
- Rejection systems
- Networking possibilities
- The HEUFT *PILOT* user interface
- Operating the device
- Brand change
- Data backup
- Cleaning and maintenance work
- Using the online help
- Test bottle check
- Program management
- User administration and access levels

Practical applications on the following subjects:

- Image processing
- Operating the HEUFT *PILOT* user interface
- Replacing spare parts
