

Operators' seminar

The HEUFT *FinalView FX* full container checks

The benefits...

During this seminar you will learn about the wide range of methods available for checking full containers and how the individual components work. Subjects such as container tracking using a shifting register and triggering, container detection, optical measuring systems for labels and rejection systems will be explained to the operator in easy to understand terms.

You will also learn:

- how the HEUFT *FinalView FX* full container check can provide you with information about your production
- how you can check parts of your line in order to maintain the efficiency of your line
- how the HEUFT *FinalView FX* full container check can help as regards product safety

- how the correct peripheral conditions can improve the detection quality

A great deal of attention will be paid to handling and operating the device. The knowledge acquired during this training course will lead to a better understanding of the HEUFT *FinalView FX* checks thereby simplifying the handling of the devices.

Taking advantage of our remote service will reduce downtimes considerably because immediate help is available if the need arises.

Seminar programme:

- The HEUFT *SPECTRUM* philosophy
- Operating the HEUFT devices
- Container tracking using a shifting register and triggering

- Basic principles of the HEUFT image processing system
- The HEUFT *FinalView FX* label inspection
- System analysis with the logic analyzer
- Replacing spare parts
- Care and maintenance
- In-depth fault analysis
- Practical, customer-specific development of different inspection modules

Practical exercises

- The HEUFT *PILOT* user interface
- Using the online help

Target group

Employees from production, maintenance and quality assurance departments.

Course fees

Training course (3 days): 1270.00 EUR excluding value added tax
