

Operators' seminar HEUFT *eXaminer XT*

The benefits...

During this seminar you will learn everything about the construction of the HEUFT *eXaminer XT* pipeline inspection and how the individual components work. Inspection principles, operation, safety concept and product liability will be explained to the operator in easy to understand terms.

You will also learn:

- how you can help yourself
- how the full pipeline inspection can help as regards product safety

A great deal of attention will be paid to handling and operating the devices. The knowledge acquired during this seminar will lead to a better understanding of the pipeline inspection thereby simplifying the handling of the devices.

Taking advantage of our remote service will reduce downtimes considerably because immediate help is available if the need arises.

Seminar programme (two days):

- The HEUFT *SPECTRUM* philosophy
- Detection systems

- Device operation
- Operating requirements
- Signal transfer
- Networking options (remote service and the offline HEUFT *PILOT*)

Practical training

- HEUFT *PILOT* user interface
- Using the online help
- Self-tests for checking the detection function
- Replacing spare parts

Target group

Employees from production, maintenance and quality assurance departments

Course fees

Two day training course: 845.00 € excluding value added tax. Course fees include training material, lunch and drinks during breaks.

Participants

Our training courses are designed for a minimum of four participants.

Course dates

Courses held in English.
