

Operators' seminar Full Container Checks

The benefits...

During this seminar you will learn about the wide range of detection methods available for checking full containers and how the individual components work. Container tracking using a shifting register and triggering, container detection, fill level detection, closure check, locator, bottle burst check and rejection systems will all be explained to the operator in easy to understand terms.

You will also learn:

- how the full container check will help you to fulfil HACCP requirements

- how the full container check can give you information about your production
- how you can check parts of your line in order to maintain the efficiency of your line
- how the full container check can help as regards product safety
- how the correct operating conditions can improve the detection quality

A great deal of attention will be paid to handling and operating the device. The knowledge imparted on the course will

lead to a better understanding of full container checks thereby simplifying the handling of the devices. Taking advantage of our remote service will reduce downtimes considerably because immediate help is available if the need arises.

Target group

Employees from production, maintenance and quality assurance departments
